

Configuration

With your installation complete, it's time to set up Socio Quiz so it will work the way you want it to work.

To help you understand how all the various features work we will walk through the configuration step by step.

To set the site name and other information, go to Admin > Config > Main Config.

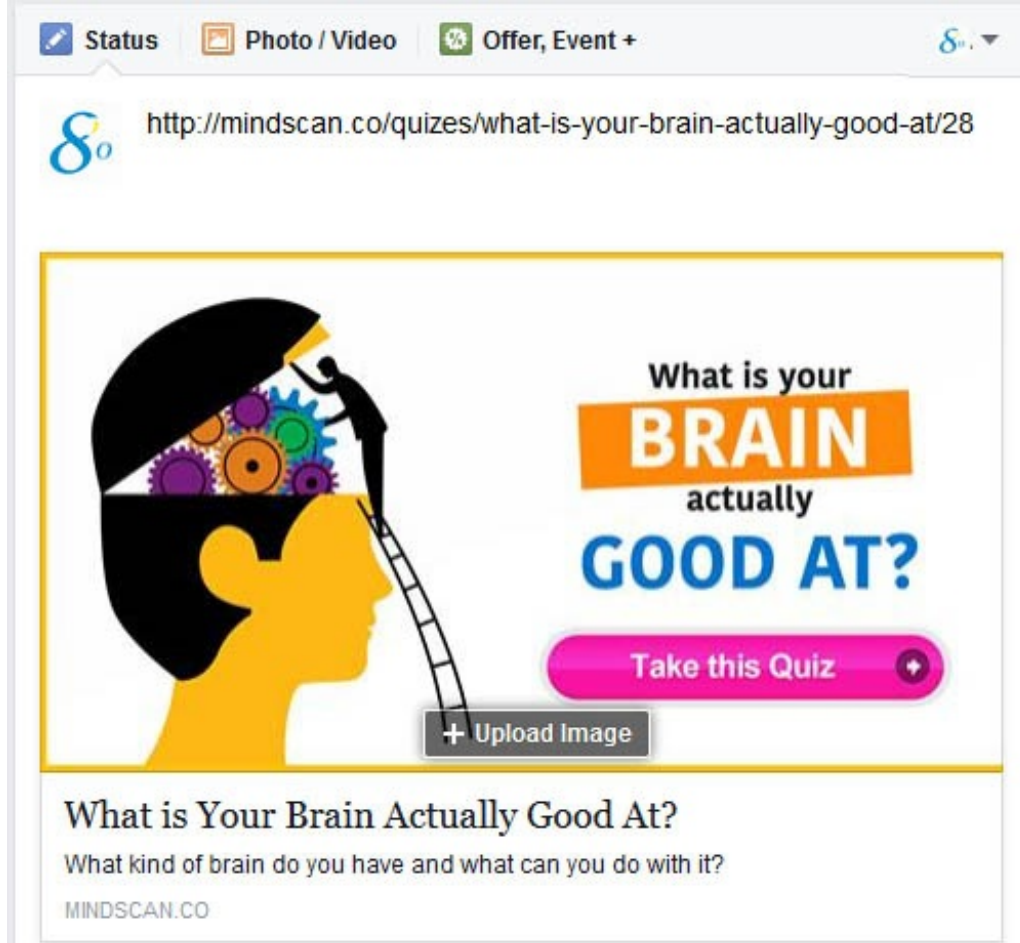

The screenshot shows the 'Super Quiz Admin panel' with a sidebar menu on the left. The sidebar includes links for Dashboard, Quizzes, Users, Config, Main Config, Quiz Config, Widgets, Languages, and Pages. The 'Main Config' option is selected. The main content area is titled 'Site Config' and contains a 'Main Configuration' section with the following fields:

- Site name:** A text input field containing 'Super Quiz'.
- Site home page's meta title:** A text input field containing 'Super Quiz | Social quizzes'.
- Site home page's meta description:** A text input field containing 'Awesome quizzes'.
- Enable user login:** A toggle switch set to 'YES'.
- Logo:** A button labeled 'choose image'.
- Favicon:** An empty text input field with a file upload icon to its right.

Information needed to be updated in the main config page are

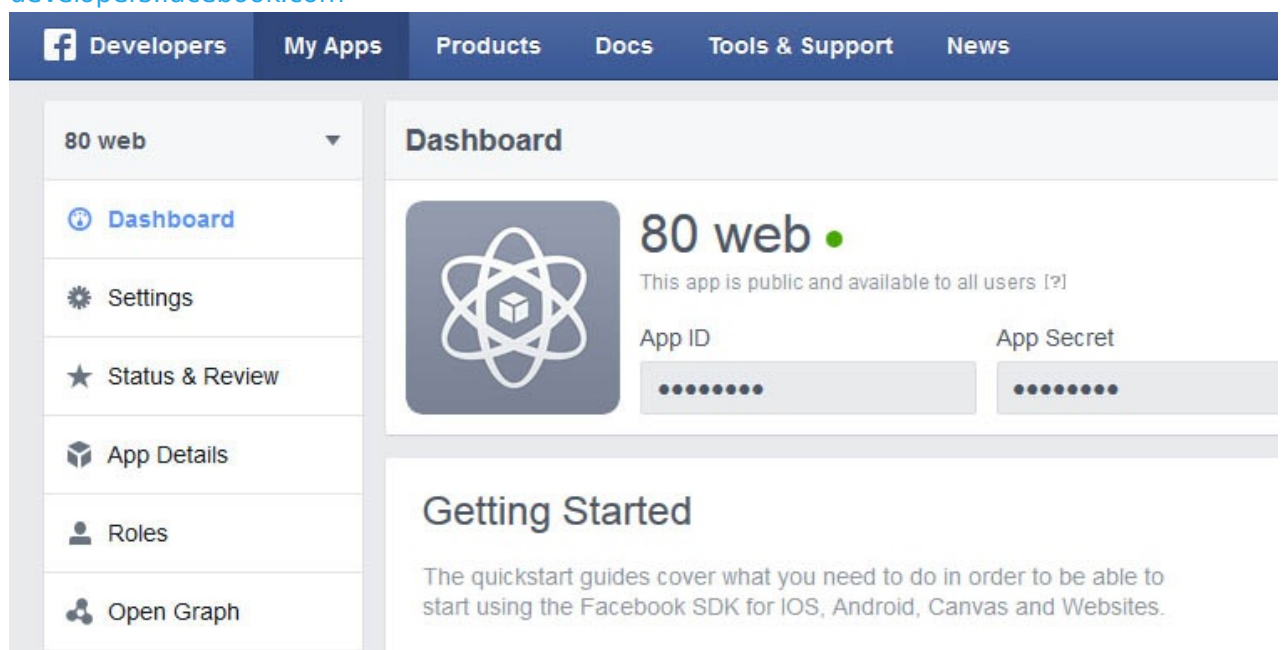

1. Site name
2. Site home page's meta title
3. Site home page's meta description
4. Enable user login
 - By enabling user login , users will have to login to attempt the quizzes.
5. Logo
6. Favicon
7. Navbar color
8. Main button color
9. Link color
10. Open graph config
 - Open graph details are data that are fetched by Facebook when links are shared to Facebook

11. Social media config

- Facebook

- Facebook App Id and App Secret key are essential user login module. Without app id and app secret key even if user login is enabled, login with Facebook will not work.
- App Id and App secret key can be obtained by creating a Facebook app at developers.facebook.com

12. Custom code (HTML/JS/CSS)

- (Not for HTML content to be displayed to user!) Code to be included inside `<head></head>` tag. For META tags and JS/CSS file/snippet inclusions. For example 'Google analytics' code and Google webmaster verification meta tag.

To change the basic settings of how quiz works, go to Admin > Config > Quiz Config.

- Dashboard
- Quizzes
- Users
- Config
 - Main Config
 - Quiz Config
- Widgets
- Languages
- Pages

Quiz Config

Quiz Configuration

Force Login

On quiz start
